6. When the installer completes, an icon will exist on the desktop if you did not disable the creation of shortcuts.

7. Double-click the shortcut on the desktop to launch the content installer. If you chose a Custom installation and disabled the creation of shortcuts, you must browse to the

directory to which the content installer files were extracted and double-click the BizNet Content Installer.exe. If you installed to the default directory location, that directory can be found in C:\Program Files (x86)\BizNet Software.

8. The content installer will inspect the server and determine what elements already exist and indicate their presence with a green check mark.

9. Click on the **Relevant Information** link in the upper right corner and make a note of the **Report Folder** name:

🗳 BizInsight	Content Installer	×
		Relevant Information
Automatic Inst	Relevant Information	
Manual Install Stages	Config Path:	\\SERVER2008R2\ConfigurationPath
Install Report S		C:\BizInsightShare\Config
Create Report Serv	Admin Path:	\\SERVER2008R2\AdministrationPath
Run Script Fil		C:\BizInsightShare\Admin
	Report Server Url:	http://SERVER2008R2/ReportServer
Deploy DataSet C	Report Folder	BizNetERP
Deploy MetaData	Sql Server MetaData Database and Instance Name:	SERVER2008R2
Admin Tool	Packaged with Content Packager	Version 1.4.0.0
Config Too	Close	Copy to Clipboard
Exit		<b>6</b> 5

**Note** If the Relevant Information dialog does not contain any information and BizInsight is already installed, go to a workstation where BizInsight is installed. Open

Excel on the workstation, click on the **Application Settings** button on the BizInsight ribbon and copy the values provided for the **Configuration Path**, the **Administration Path**, the **Default Reporting Services Server** and the **Default Reporting Services Folder Name** fields.

10. Click Automatic Install.

11. The content installer will deploy the MetaData and function content. The path will be automatically defaulted to the path last used. Click **OK**.

Prel	Installation Question					
(	Deploy Local Content					
	Please choose a directory location for the Configuration Path:		C:\BizInsightShare\Config		Browse	
	This directory will become a shared network directory after the i		nstallation process.			Override Configuration Path
		Ok		L	Cancel	
						///

- 12. The content installer will open the content deployment dialog. Most paths will not need to be changed. But you must check the following to make sure they are correct:
  - a. Make sure the folder name is the folder name currently being used. If the folder is not the same as shown in the Relevant Information dialog, change that field to match the folder that is currently being used.

Content Deployment			
Content Location	🖉 Relevant Information		_ 🗆 🗙

20. Repeat the above steps for each content pack that needs to be installed.

## Step 2: Updating Client Workstations with new Content

Once all BizContent updates have been updated on the server, each client workstation installation needs to be updated with the new content add-in files.

If BizInsight is being used in a Citrix/Terminal Services environment, <u>see "Implementing</u> Additional BizInsight Content on a Citrix/Terminal Services Server" on the next page.

If BizInsight is installed on individual workstations, instruct all BizInsight users to click on the **Scan for Content** button on the BizInsight ribbon in Excel to update their workstations with the new content.

If the users report that the Scan for Content button is missing, they may not have the most current BizInsight version. The Scan for Content button was added in version 5.0.34. BizNet Software recommends downloading and installing the latest BizInsight version but if you must use an older version, see "Manually Installing BizContent Add-ins" on page 12.

If your users report an error similar to the following when opening Excel again, <u>see</u> "Resolving ".xll could not be found" errors" on page 24 for steps to resolve.

# Implementing Additional BizInsight Content on a Citrix/Terminal Services Server

- 1. Copy all new BizContent add-in files (.dll, .dna and .xll) from the Configuration Path to the local BizInsight directory. If you do not know the location of the Configuration Path, launch the Content Installer on the server and click on the Relevant Information link in the upper right of the dialog.
- 2. Browse to the reg5 subdirectory of the local BizInsight directory. Open the file named "Excelxxxx\_register\_OnDemand.reg" with Notepad.
- 3. Copy the last **Open***n* entry in this file and paste directly below. Increment the Open *n* and change the name to the new BizContent .xll file name. Repeat for each new content .xll file until all are represented in the file. For example:

"OPEN"="/A \"BizInsightXL.Foundation\"" "OPEN1"="/R \"C:\\BizInsight\\BizNetERPGL.xII\"" "OPEN2"="/R \"C:\\BizInsight\\MAS500GL.xII\"" "OPEN3"="/R \"C:\\BizInsight\\MAS500AR.xII\""

- 4. Save your changes to the file.
- 5. Browse to the reg5 subdirectory of the BizInsight directory and execute the "**Register BizInsight for Excel** *xxxx* **OnDemand.bat**" file to make sure it runs without error.
- 6. Have each BizInsight user execute the "Register BizInsight for Excel xxxx OnDemand.bat" to register the additional content for their login.

## Appendices

Manually Installing BizContent Add-ins	12
Resolving ".xll could not be found" errors	24

#### Manually Installing BizContent Add-ins

If you are using a BizInsight version that is older than 5.0.34, you will need to register the BizContent add-ins manually in Excel. BizNet Software recommends upgrading to the latest BizInsight version but if that is not possible, perform the following steps:

1. Browse to the BizInsight shared directory and copy the content add-in files (.dll, .xll and .dna) to the directory to which you installed the BizInsight client. If you are using separate config and admin folders, the client add-in files will be in the config folder.

The remaining steps vary based on the Office version installed:

Office 2010/2013 steps Excel 2007 steps Excel 2003 steps

#### Excel 2010/2013

1. Click on File > Options.

The Add-ins dialog should now look like the following:

4. Click **OK**.

#### Resolving ".xll could not be found" errors

In some rare instances, the name of the content add-in file provided with an update may change. When an add-in file name is changed, Scan for Content will properly remove that add-in file but will not delete the pointer to it that resides within Excel and the following error will occur:

Perform the following steps to resolve the issue:

The remaining steps vary based on the Office version installed:

Office 2010/2013 steps Excel 2007 steps Excel 2003 steps

#### Excel 2010/2013

1. Click on **File > Options.**
