Manually Installing BizContent Add-ins	13
Resolving ".xll could not be found" errors	25

Step 1: Run Content Installer for Additional Content Pack(s)

- If you have not done so already, download any additional content pack installer(s) from the customer portal, <u>http://biznet.flexnetoperations.com</u>
- 2. Extract the contents of the .zip to any location that is accessible from both the server and the client workstations.
- 3. Browse to the extract directory and double-click on the file named setup.exe.

4. The Welcome dialog will open. Click Next.

•	Show details	Yes No	
		Change when these notifications appe	<u>ar</u>

9. When the installer completes, an icon will exist on the desktop if you did not disable the creation of shortcuts.

10. Double-click the shortcut on the desktop to launch the content installer. If you chose a Custom installation and disabled the creation of shortcuts, you must browse to the

directory to which the content installer files were extracted and double-click the BizNet Content Installer.exe. If you installed to the default directory location, that directory can be found in C:\Program Files (x86)\BizNet Software.

11. The content installer will inspect the server and determine what elements already exist and indicate their presence with a green check mark.

12. Click on the **Relevant Information** link in the upper right corner and make a note of the **Report Folder** name:

🚰 BizInsight	Content Installer	×
		Relevant Information
Automatic lost	Pelovant Information	
Manual Install Stages	Config Path:	
Install Report S	Coning Fault.	C:\BizInsiahtShare\Config
Create Report Serv	Admin Path	VISER//ER2009R2/AdministrationRath
Run Script Fil	Aunin Faul.	C:\BizInsightShare\Admin
	Report Server Url:	http://SERVER2008R2/ReportServer
Deploy DataSet C	Report Folder	BizNetERP
Deploy MetaData	Sql Server MetaData Database and Instance Name:	SERVER2008R2
Admin Tool	Packaged with Content Package	r Version 1.4.0.0
Config Too	Close	Copy to Clipboard
Exit		ß

Note If the Relevant Information dialog does not contain any information and BizInsight is already installed, go to a workstation where BizInsight is installed. Open

Excel on the workstation, click on the **Application Settings** button on the BizInsight ribbon and copy the values provided for the **Configuration Path**, the **Administration Path**, the **Default Reporting Services Server** and the **Default Reporting Services Folder Name** fields.

13. Click Automatic Install.

14. The content installer will deploy the MetaData and function content. The path will be automatically defaulted to the path last used. Click **OK**.

Please choose a directory location for the Configuration	Path: C:\BizInsightShare\Config	Browse
This directory will become a shared network directory a	ter the installation process.	Override Configuration Pat
or Technical Use Only		
Currently installing to Sql Server instance:	Not Selected Yet	
Override Automatic Sql Server Detection		
Select A Sol Server For MetaData:	Select Sgl Server	

NOTE Do not check the Override Automatic SQL Server Detection checkbox to ensure the meta data is installed to the same meta data databases as your other content.

15. The content installer will open the content deployment dialog. Most paths will not need to be changed. But you must check the following to make sure they are correct:

a. Make sure the folder name is the folder name currently being used. If the folder is not the same as shown in the Relevant Information dialog, change that field to match the folder that is currently being used.

Content Deployment			
Content Location	🖉 Relevant Information		
	Config Path:	\\SERVER2008R2\ConfigurationPath	
C:\Program Files (x86)\BizNet Softw Directory where you installed the content f		C:\BizInsightShare\Config	
Ch Reporting Services Settings – Default Reporting Services Se <u>http://SERVER2008R2/Rep</u> Format: "http://server/reportserver/	ange the folder name if it does not match the information from the Relevant information dialog	\\SERVER2008R2\AdministrationPath C:\BizInsightShare\Admin http://SERVER2008R2/ReportServer BizNetERP	
Default Reporting Services Folders MSGP	Sql Server MetaData Database and Instance Name:	SERVER2008R2	
Deployment Options	Close Data Source Name:	Copy to Clipboard	H I

- b. Adjust the Server Name field if your accounting system database is on another server. NOTE The server name will default to the last server used. This may not be the right server for the content pack being deployed.
- c. Adjust the **Database Name** field to point to your accounting system database. If your accounting software uses a system or control database, provide the name of that database rather than a company database name. **NOTE** The database name will default to the last database used. This may not be the right database for the content pack being deployed.
- 16. Select the desired authentication method Windows authentication or Prompt for Credentials.

IMPORTANT You must use the same authentication method as selected for other content packs.

Overwrite Datasources	Data Source Name: MSGP
✓ Overwrite Reports	Server Name: SERVER2003
Preserve Folder Structure	Database Name: Dynamics
Use Folders for Datasources	Use Windows Authentication C Promot For Credentials

- 17. Click **Deploy Content**.
- 18. The content installer will display a status message to indicate that it is working.

- 19. Once complete, the installer will display links to the Reporting Services sites. Click **OK** to continue with the installation.
- 20. The License Administration Tool will open. Unless you need to add new users, click Exit.

License Administration Tool - SERVER2008R2\linda	<u> </u>

23. Repeat the above steps for each content pack that needs to be installed.

Step 2: Updating Client Workstations with new Content

Once all BizContent updates have been updated on the server, each client workstation installation needs to be updated with the new content add-in files.

If BizInsight is being used in a Citrix/Terminal Services environment, <u>see "Implementing</u> Additional BizInsight Content on a Citrix/Terminal Services Server" on the next page.

If BizInsight is installed on individual workstations, instruct all BizInsight users to click on the **Scan for Content** button on the BizInsight ribbon in Excel to update their workstations with the new content.

If the users report that the Scan for Content button is missing, they may not have the most current BizInsight version. The Scan for Content button was added in version 5.5 SP1. BizNet Software recommends downloading and installing the latest BizInsight version but if you must use an older version, see "Manually Installing BizContent Add-ins" on page 13.

If your users report an error similar to the following when opening Excel again, <u>see</u> "Resolving ".xll could not be found" errors" on page 25 for steps to resolve.

Microsoft	Office Excel
<u>^</u>	'c:\users\inda\documents\BizContent\BizNetERP.xll' could not be found. Check the spelling of the file name, and verify that the file location is correct. If you are trying to open the file from your list of most recently used files, make sure that the file has not been renamed, moved, or deleted.
	OK

Implementing Additional BizInsight Content on a Citrix/Terminal Services Server

- 1. Copy all new BizContent add-in files (.dll, .dna and .xll) from the Configuration Path to the local BizInsight directory. If you do not know the location of the Configuration Path, launch the Content Installer on the server and click on the Relevant Information link in the upper right of the dialog.
- 2. Browse to the reg5 subdirectory of the local BizInsight directory. Open the file named "Excelxxxx_register_OnDemand.reg" with Notepad.
- 3. Copy the last **Open***n* entry in this file and paste directly below. Increment the Open *n* and change the name to the new BizContent .xll file name. Repeat for each new content .xll file until all are represented in the file. For example:

"OPEN"="/A \"BizInsightXL.Foundation\""

- 4. Save your changes to the file.
- 5. Browse to the reg5 subdirectory of the BizInsight directory and execute the "**Register BizInsight for Excel xxxx OnDemand.bat**" file to make sure it runs without error.
- 6. Have each BizInsight user execute the "Register BizInsight for Excel xxxx OnDemand.bat" to register the additional content for their login.

Appendices

Manually Installing BizContent Add-ins	13
Resolving ".xll could not be found" errors	. 25

Manually Installing BizContent Add-ins

If you are using a BizInsight version that is older than 5.5 SP1, you will need to register the BizContent add-ins manually in Excel. BizNet Software recommends upgrading to the latest BizInsight version but if that is not possible, perform the following steps:

1. Browse to the BizInsight shared directory and copy the content add-in files (.dll, .xll and .dna) to the directory to which you installed the BizInsight client. If you are using separate config and admin folders, the client add-in files will be in the config folder.

The remaining steps vary based on the Office version installed:

Office 2010/2013 steps Excel 2007 steps Excel 2003 steps

Excel 2010/2013

1. Click on File > Options.

The Add-ins dialog should now look like the following:

4. Click **OK**.

Resolving ".xll could not be found" errors

In some rare instances, the name of the content add-in file provided with an update may change. When an add-in file name is changed, Scan for Content will properly remove that add-in file but will not delete the pointer to it that resides within Excel and the following error will occur:

Perform the following steps to resolve the issue:

The remaining steps vary based on the Office version installed:

Office 2010/2013 steps Excel 2007 steps Excel 2003 steps

Excel 2010/2013

1. Click on File > Options.

The Add-ins dialog should now look like the following:

- 4. Click **OK**.
- 9. Once in the add-ins dialog, uncheck the add-in mentioned in the error message. You should get the following message. Click **Yes**. If you do not get this message, you have unchecked the wrong add-in. Re-check it and uncheck the next one that is shown that has a similar name.
