Manually Installing BizContent Add-ins	14
Resolving ".xll could not be found" errors	26

## **Step 1: Run Content Installer for Additional Content Pack(s)**

- If you have not done so already, download any additional content pack installer (s) from the customer portal, <u>http://biznet.flexnetoperations.com</u>
- 2. Extract the contents of the .zip to any location that is accessible from both the server and the client workstations.
- 3. Browse to the extract directory and double-click on the file named **setup.exe**.

4. The Welcome dialog will open. Click Next.

🙀 BizInsight Content Installe	r Content Pack Name S	etup	_ 🗆 X
	Welcome to the Biz Installer <i>Content I</i> Wizard		
	The Setup Wizard will install BizInsightSunGardEAS on yo continue or Cancel to exit th	our computer. Click Nex	
	<u>B</u> ack.	Next	Cancel

5. Review the End User License Agreement and if you agree to the terms, check the I **accept the terms in the License Agreement** checkbox and click **Next**.

Please read the following license ag			BizNetsoft

#### Custom setup type options that are available:

Select the way you want features to be	installed.
Click the icons in the tree below to chang	ge the way features will be installed.
Image: BizInsight     1.0       Image: BizIns	This feature requires 927MB on
	your hard drive.

7. Click Install.

8. Click **Yes** to any User Account Control messages.

🌍 User	r Account Contr	ol	×
		o allow the following program from an unknown ake changes to this computer?	
	Program name:	Class 111 Desire Date Brief Brief Printer	
	Publisher: File origin:	<b>Unknown</b> Hard drive on this computer	
•	Show details	Yes No	
		Change when these notifications appr	<u>ear</u>

9. When the installer completes, an icon will exist on the desktop if you did not disable the creation of shortcuts.

10. Double-click the shortcut on the desktop to launch the content installer. If you chose a Custom installation and disabled the creation of shortcuts, you must

browse to the directory to which the content installer files were extracted and double-click the BizNet Content Installer.exe. If you installed to the default directory location, that directory can be found in C:\Program Files (x86)\BizNet SoftwareEpicor.

11. The content installer will inspect the server and determine what elements already exist and indicate their presence with a green check mark.

12. Click on the **Relevant Information** link in the upper right corner and make a note of the **Report Folder** name:

💣 BizInsight	Content Installer	×
		Relevant Information
Automatic Inst	Nelevant Information	_ <b>_ _ _ _ _</b>

Exit		(5

*Note* If the Relevant Information dialog does not contain any information and

BizInsight is already installed, go to a workstation where BizInsight is installed. Open Excel on the workstation, click on the **Application Settings** button on the BizInsight ribbon and copy the values provided for the **Configuration Path**, the **Administration Path**, the **Default Reporting Services Server** and the **Default Reporting Services Folder Name** fields.

13. Click Automatic Install.

14. The content installer will deploy the MetaData and function content. The path will be automatically defaulted to the path last used. Click **OK**.

23. Repeat the above steps for each content pack that needs to be installed.

### **Step 2: Updating Client Workstations**

Once all BizContent updates have been updated on the server, each client workstation installation needs to be updated with the new content add-in files and BizInsight Desktop Edition installed if the new content pack is a System Connector.

If BizInsight is being used in a Citrix/Terminal Services environment, <u>see "Implementing</u> Additional BizInsight Content on a Citrix/Terminal Services Server" on page 13.

If BizInsight is installed on individual workstations, instruct all BizInsight users to click on the **Scan for Content** button on the BizInsight ribbon in Excel to update their workstations with the new content.

If the users report that the Scan for Content button is missing, they may not have the most current BizInsight version. The Scan for Content button was added in version 5.5 SP1. BizNet Software recommends downloading and installing the latest BizInsight version but if you must use an older version, see "Manually Installing BizContent Add-ins" on page 14.

If your users report an error similar to the following when opening Excel again, <u>see</u> <u>"Resolving ".xll could not be found" errors" on page 26</u> for steps to resolve.

Microsoft (	Office Excel
	'c:\users\inda\documents\BizContent\BizNetERP.xll' could not be found. Check the spelling of the file name, and verify that the file location is correct.
	If you are trying to open the file from your list of most recently used files, make sure that the file has not been renamed, moved, or deleted.
	OK

Implementing Additional BizInsight Content on a Citrix/Terminal	
Services Server	. 13
Manually Installing BizContent Add-ins	14
Resolving ".xll could not be found" errors	26

# Implementing Additional BizInsight Content on a Citrix/Terminal Services Server

- 1. Copy all new BizContent add-in files (.dll, .dna and .xll) from the Configuration Path to the local BizInsight directory. If you do not know the location of the Configuration Path, launch the Content Installer on the server and click on the Relevant Information link in the upper right of the dialog.
- 2. Browse to the reg5 subdirectory of the local BizInsight directory. Open the file named "Excelxxxx\_register\_OnDemand.reg" with Notepad.
- 3. Copy the last **Open***n* entry in this file and paste directly below. Increment the Open*n* and change the name to the new BizContent .xll file name. Repeat for each new content .xll file until all are represented in the file. For example:

"OPEN"="/A \"BizInsightXL.Foundation\""

- 4. Save your changes to the file.
- Browse to the reg5 subdirectory of the BizInsight directory and execute the "Register BizInsight for Excel xxxx OnDemand.bat" file to make sure it runs without error.
- 6. Have each BizInsight user execute the "Register BizInsight for Excel *xxxx* OnDemand.bat" to register the additional content for their login.

#### Manually Installing BizContent Add-ins

If you are using a BizInsight version that is older than 5.5 SP1, you will need to register the BizContent add-ins manually in Excel. BizNet Software recommends upgrading to the latest BizInsight version but if that is not possible, perform the following steps:

1. Browse to the BizInsight shared directory and copy the content add-in files (.dll, .xll and .dna) to the directory to which you installed the BizInsight client. If you are using separate config and admin folders, the client add-in files will be in the config folder.

The remaining steps vary based on the Office version installed:

Office 2010/2013 steps Excel 2007 steps Excel 2003 steps

Excel 2010/2013

1. Click on **File > Options.**

#### **Resolving ".xll could not be found" errors**

In some rare instances, the name of the content add-in file provided with an update may change. When an add-in file name is changed, Scan for Content will properly remove that add-in file but will not delete the pointer to it that resides within Excel and the following error will occur:

Perform the following steps to resolve the issue:

The remaining steps vary based on the Office version installed:

Office 2010/2013 steps Excel 2007 steps Excel 2003 steps

The Add-ins dialog should now look like the following:

4. Click **OK**.

#### **Excel 2007**

1. Click on the **Office** button and then click on the **Excel Options** button.

2. Click on **Add-ins** in the left pane and then click on **Go** at the bottom on the right pane.

The Add-ins dialog should now look like the following:

- 4. Click **OK**.
- 9. Once in the add-ins dialog, uncheck the add-in mentioned in the error message. You should get the following message. Click **Yes**. If you do not get this message, you have unchecked the wrong add-in. Re-check it and uncheck the next one that is shown that has a similar name.

Microsoft Office Excel	
Cannot find add-in 'C:\BizNet Software\BizInsight	.xll'. Delete from list?

10. Close and reopen Excel to confirm that the error no longer occurs.
