1. BizNet Broadcast - Enhancements

1.1. Minor Enhancements

1.1.1. Broadcast Message Box Displays Column and Row Count

When Broadcast encounters an issue in a Distribution row, the error message prompt will provide the location of the Distribution row that was unsuccessful. For example, Broadcast skipped row A8 due to an error in the Selection column.

1.1.2. Broadcast Automatic Overwrite Option for Output Files

Broadcast automatically overwrites files with the same file name and extension in the output folder location. The Distribution row must contain a Path and Filename. In the Application Setting, a new option allows the user to enable or disable the overwriting feature. Broadcast has the overwrite files option enabled by default. When the overwrite option is unchecked, Broadcast appends a number to the file name. If both Path and EmailTo columns are used and the overwrite feature is disabled, the email will contain the file name with the appended number.

| Broadcast Settings | |

| ✓ Use Default Template File | |
| Custom Distribution List Template File: | |
| | |
| Uncheck "Use Default Template File" to use a custor | nized template file. |
| | OK Cancel |

1.1.3. A File Name is Required with MergeFile Parameter

Users are required to provide a file name for the output file if the distribution row uses a MergeFile parameter. Broadcast will stop the processing and prompt the user. Users will not be required to provide a file name when MergeFiles is not used. Broadcast will use the default naming convention, Book1.

| | | Ad |
|-----------|----------|------------------------------------|
| Selection | FileName | MergeFiles |
| Sheet1 | | C:\Users\test\Documents\Book1.xlsx |
| | | |

| BizBroadcast™ | x |
|---|-----------|
| Broadcast cancelled at row A6. The FileName is empty. Please file name for the output file. Broadcast skipped for this row. | provide a |
| | ок |

2. BizNet Broadcast – Bug

2.1. Broadcast Distribution Template is not supported in xls, xlm, xlt, and csv Format

When a user saves a workbook with a Broadcast Distribution template in a xls, xlm, xlt, or csv format, then the user attempts to run Broadcast using the new workbook, the user will experience an unhandled exception during processing. Broadcast Dristribution List is only supported in xlsx, xlsm, xltx, or xlsb format. In the event a user attempts to process a Broadcast Distribution template in an unsupported format, Broadcast will prompt the user to save the workbook in a supported file type.

2.2. SMTP Error Prompt Message Box Update

Error messaging has been enhanced SMTP email output.

2.3. Preserve Formula is Enabled with no Formulas Entered Error

In the previous Broadcast release, a distribution would fail when the following circumstances existed:

- Preserve formulas was enabled in the Application Settings,
- No formulas were entered in the list, and
- The RenderFormat was xlsx.

This issue has been resolved to allow Broadcast to continue processing all rows. The user will now be notified of skipped rows after valid Broadcasts have completed.

| Broadcast Settings | |
|---|--------|
| General Calculation Formulas | |
| ✓ Preserve Formulas for each Broadcast Item | |
| Please specify the formulas that you want to preserve in the excel worksheet. For example, SUM, IF, VLOOKUP. Do not insert = or (). Preserved Formulas | |
| Enter Formula | |
| Add Formula | |
| Remove Formula | |
| | |
| | |
| | |
| J | |
| ОК | Cancel |
| Broadcast Skipped | x |
| Please specify the formulas to preserve in the Application setting. Broadcast skipped for the rows A6 A7 A8 A9. | |
| ОК | |

2.4. Preserve Formula is Disabled with no Formulas Entered Error

In the previous Broadcast release, a distribution would fail when the following circumstances existed:

- Preserve formulas was disabled in the Application Settings
- No formulas were entered in the list
- RenderFormat was xlsx, and
- The[PRESERVE] directive is used in the Selection column.

This issue has been resolved to allow Broadcast to continue processing all rows. The user will now be notified of skipped rows after valid Broadcasts have completed.

| | × |
| Broadcast Skipped | × |
| Please specify the formulas to preserve in the Application sett Broadcast skipped for the rows A6 A7 A8. | ing. |

2.5. Named Ranges are not Referenced in the Additional Optional Parameters

Previously, once a user double-clicked the Additional Parameters list to display all named ranges in the Excel workbook, the list would never update to reflect new named ranges that had been created. This issue has been resolved by adding the new named range to the delivered Additional Parameters drop down list. To update the Additional Optional Parameters drop down list, simply double-click on the column header again.

1. Create a name range

| Cipbodia is | | |
|---------------------------|---|--|
| C37 | : | |
| Additional Parameters | | |
| BroadcastList | | |
| BroadcastRenderFormatList | | |
| MyNamedRange | | |
| | | |

2. Double-click an Additional Optional Parameters drop-down list. This will refresh the list.

| | MyNamedRange | • |
|--------|--------------|---|
| EmailF | rom 🔺 | |
| EmailE | Body | |
| Attach | Attachments | |
| Merge | Files | 1 |
| Printe | rName = | |
| Passw | ord | 1 |
| Calcul | ation | |
| MyNa | medRange 🔹 | 1 |

3. The named range appears in the Distribution Template Named Range after double-clicking on the Additional Optional Parameters drop-down list.

| AdditionalParameters | BroadcastRenderFormats |
|----------------------|------------------------|
| | PDF |
| EmailCC | XPS |
| EmailBCC | XLSX |
| EmailPriority | XLSXVALUES |
| EmailFrom | XLSM |
| EmailBody | XLSMVALUES |
| Attachments | XLS |
| MergeFiles | XLSVALUES |
| PrinterName | MHTML |
| Password | HTML |
| Calculation | CSV |
| MyNamedRange | |

2.6. Broadcast Add-in Name does not Display in the Customize Ribbon

| Excel Options | ନ୍ଧ <mark>×</mark> |

| | ☐ Merge & Center |
| | |
| | OK Cancel |

In the Customize Ribbon section, BizNet Broadcast is displayed in the File> Options > Customized Ribbon menu.

2.7. Missing Path or Email Message Prompt Update

In the Distribution template, when both Path and Email sections are blank, the error messaging prompt did not include the proper row address. The new process provides the row address in the error message. The user will receive an error message prompt for each row missing Path and Email.

| BizBroadca | ist ™ | X |
|------------|---|----|
| 8 | Broadcast Failed at row A8 . Please enter either Path or Em. DONOTPROCESS in one of them to skip the row during Br least one of them is required. | |
| | | ОК |

2.8. About Box - Trial Mode Displays 1/1/900 Issue

The product has been updated to display "Unlicensed" in the About dialog when BizNet Broadcast is being used In trial mode.

2.9. Broadcast Distribution EmailBody Issue

Broadcast 2.1 users have experienced issues with the EmailBody parameter. When a value is inserted in the cell, an unhandled exception may occur due to the email format type or other environmental settings. This issue is resolved and users are able to use the parameter without issues.

| F | G | |
|----------|-----------|--|
| | | |
| | | |
| | | |
| | | |
| FileName | EmailBody | |
| | | |
| | | |

2.10. Switching Between BizInsight and Broadcast Issue

When BizInsight and Broadcast are installed on the same client machine, users may have experienced an unhandled exception error switching between the multiple BizInsight workbooks and Broadcast Distribution templates. This issue is resolved and users are able to change between BizInsight and Broadcast workbooks without issues.

3. BizNet Broadcast – Known Issues

- 1. When errors are prompted during Broadcast processing, reference the About box for further details on the issue.
- 2. A reference error can occur in any workbooks. If cell referencing is used in the Distribution Template and the reference is broken or missing, Broadcast processing may return a #REF! error in the Excel ID: -2146826265 in the file or filename.
- 3. When users save a Broadcast distribution template in xltx (xlt format is unsupported) and add a new node in BizInsight to drag and drop the workbook as a template, Broadcast cannot process the drag and drop distribution template inside the workbook template. The drag and drop method in BizInsight creates a temporary workbook file which cannot be processed for multiple iterations by Broadcast.

Workaround:

A. If the drag and drop method is used, save the Distribution template in only xlsx format for Broadcast to process. The newly created workbook will need to be saved on the local machine for Broadcast to distribute multiple times.

B. In Excel, open the workbook template separately and click the Run Now button to process the Broadcast distribution template.

4. When users save a Broadcast Distribution template with a workbook containing dynamic analysis sets (see screenshot below) and the user attempts to distribute using Broadcast, Broadcast will prompt to the user save the workbook and fail to distribute after the first time. Excel workbooks that are dragged and dropped from BizInsight are created as a temporary file on the local machine. Broadcast is unable to recognize a temporary file. The workaround for the drag and drop feature in BizInsight is to save Broadcast Distribution templates in only xlsx format and save the newly created workbook on the local machine for Broadcast to distribute multiple times.

| Parameters | | _? <mark>_ ×</mark> _ |
|---|---|--|
| Parameter <u>n</u> ame: | | How parameter value is obtained: |
| RDLName RDLLocation UserID Password PK Expiration DataSetFilter | * | Prompt for value using the following string: Use the following value: |
| | | Get the value from the following cell: = Sheet1!\$J\$4 |
| | Ŧ | Refresh automatically when cell value changes |
| | | OK Cancel |

4. Appendix

Preserve and No Preserve Process Order

- 1. RenderFormat: XLSX or XLSXVALUES
- 2. Preserve formula is enabled or disable (Application Setting). Formula list contains values.
- 3. Preserve or No Preserve is used in the Selection column
- 4. Merge is or is not selected in the Additional Optional Parameters
