1. Introduction

This document provides overall information about the BizInsight 5.5 for SunGard EAS release. Detailed documentation of the product and how to use it is available for download.

BizInsight is a business reporting application and is an add-in product to Microsoft Excel which means that BizInsight features are accessed from within Excel. BizInsight provides functionality that retrieves data from the SunGard EAS system. After BizInsight is installed, additional menus and options will be visible and usable within Excel for building business reports.

2. Available Documentation

The following documentation is available for download from: www.biznetsoftware.com/bizinsight-eas.html.

Document	Description
BizNet EULA	End User License Agreement stating the terms and conditions of purchasing a BizInsight license
BizInsight 5.5 for SunGard EAS System Requirements	Lists the system requirements for using BizInsight
BizInsight 5.5 for SunGard EAS Installation Guide	Provides detailed installation and configuration instructions for connecting BizInsight to SunGard EAS
Guide to Using BizInsight 5.5	Provides information on how to use BizInsight
BizInsight User Types	Describes the different BizInsight user types and their capabilities in the product
BizInsight 5.5 Citrix Terminal Services Deployment	Describes the additional steps necessary for installing the BizInsight client onto a Citrix/Terminal Services server

3. Known Issues

Following is a list of known issues as of the time of release.

Issue	Workaround (if exists)
64-bit Installer to allow BizInsight to run in 64-bit mode	BizInsight can run in 32-bit mode on a 64-bit platform.
Pivot tables cannot be refreshed	Do not save pivot tables in your workbooks. Re-add as needed for updated data.
#REPORT_SERVER error when the Microsoft Analysis Toolpak-VBA add-in is enabled	Disable the Microsoft Analysis Toolpak-VBA add-in when working with BizInsight
#REPORT_SERVER error when the Navigation Pane is collapsed or not visible	When refreshing a BizInsight report, ensure that the Navigation Pane is visible. It can be resized but must not be collapsed.
Pivot layouts are RDL specific	
No error message is displayed when data source login fails during report execution	
The order of multiple row items in a Pivot Layout cannot be changed	
Using F4 to anchor cell references only works the first time	Click back in the parameter value field in the Function Arguments dialog to reset focus on that field and press F4 again
Cannot use Excel's INDIRECT() function inside a BizInsight function	
Cache not found in memory when drilling down on a function that does not supply a parameter required by the drill down data set.	

Issue	Workaround (if exists)
Classic pivot layout is not saved when saving pivot layout	
Drilling down on cells containing functions for approved and WIP transactions only return approved transactions	Separate the approved and WIP functions into separate cells.
Drill downs do not reflect updates made in EAS	Stop and restart the BizNet Caching service to force data to be re-cached.

4. Technical Support

If you have any questions regarding this release, please contact BizNet Software by submitting your questions using our online submission form at http://www.biznetsoftware.com/open-new-issue.html or by phone at 1-888-803-5227, option #2.
