License Your BizNet Product Installation

BizNet Product comes with a 45 day trial during which all capabilities are functional. Once the trial is expired or if BizNet Product has been installed on the workstation before, the ribbon will only have a few buttons enabled until the product is activated.

1. If there is a content installer icon on the desktop, double-click that icon to launch the content installer:

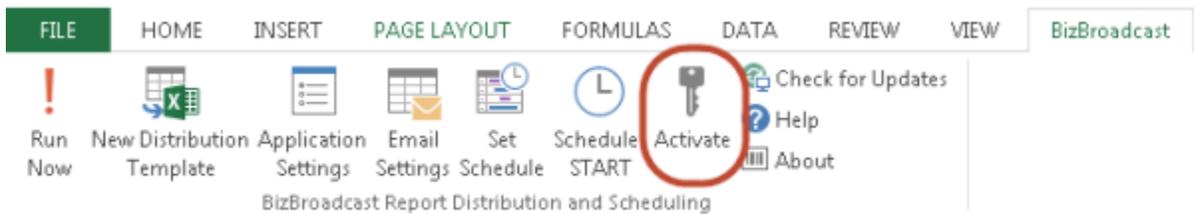

If there isn't a content installer icon on the desktop, browse to `c:\Program Files (x86)\Biznet Software\Content Name` and double-click the BIZNET Content Installer.exe.

PC > Local Disk (C:) > Program Files (x86) > Biznet Software > BizNet Sample Data 1.2.0.0 >

Name	Date modified	Type	Size
BizInsight Installation Files	12/5/2016 3:18 PM	File folder	
BizNetServer Installation Files	12/5/2016 3:18 PM	File folder	
Content	12/5/2016 3:18 PM	File folder	
AccessToSQL.dll	11/15/2016 10:50 ...	Application extens...	
AccessToSQL.dll.config	11/15/2016 10:50 ...	CONFIG File

IMPORTANT

Key must be activated under the user's profile and there is one activation per machine. License activation requires internet access. If internet access is not available or the activation call is being blocked, the License Activation dialog will not open. See "Manual License Activation" on page 7 for alternate instructions.

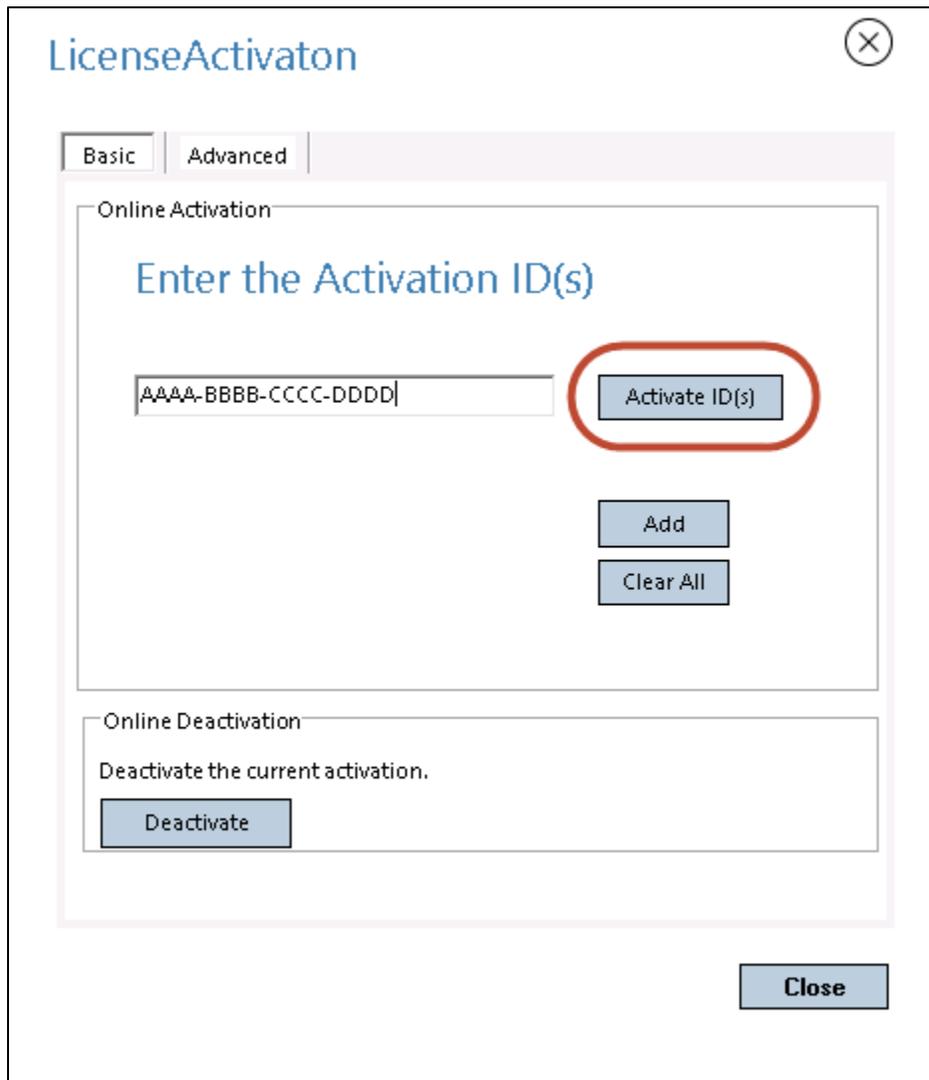

When a BizNet Product order is processed, your license Activation ID is emailed to the individual named on the order:

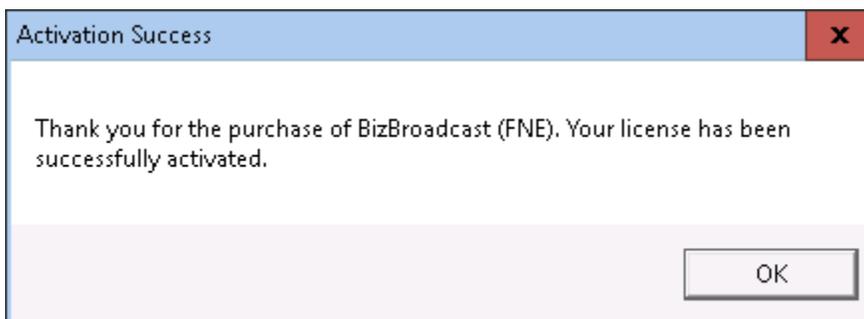

If you are unable to locate that email, the Activation ID can also be found on the customer portal (<https://biznet.flexnetoperations.com>). Once logged into the portal, click on **Order History** on the left. If you have purchased multiple products, click on the entries until you locate the BizNet Product entry.

Copy the Activation ID and paste it into the **Enter the Activation ID(s)** field and click on **Activate ID(s)**.

The **Activation Success** dialog will display.

Manual License Activation

In the event the workstation where the BizNet Product is installed does not have internet access or activation is being blocked, perform the following steps to manually activate the license.

1. If there is a content installer icon on the desktop, double-click that icon to launch the content installer:

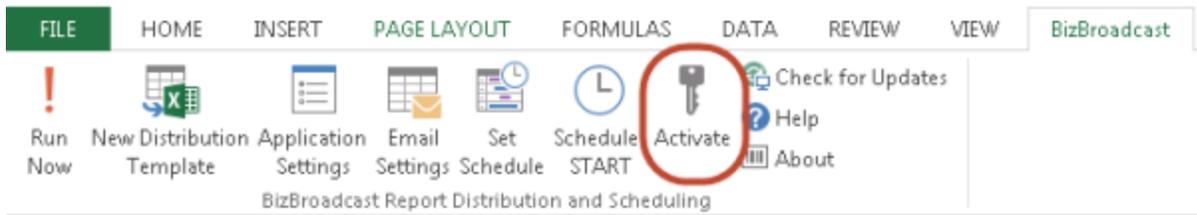

If there isn't a content installer icon on the desktop, browse to `c:\Program Files (x86)\Biznet Software\Content Name` and double-click the BIZNET Content Installer.exe.

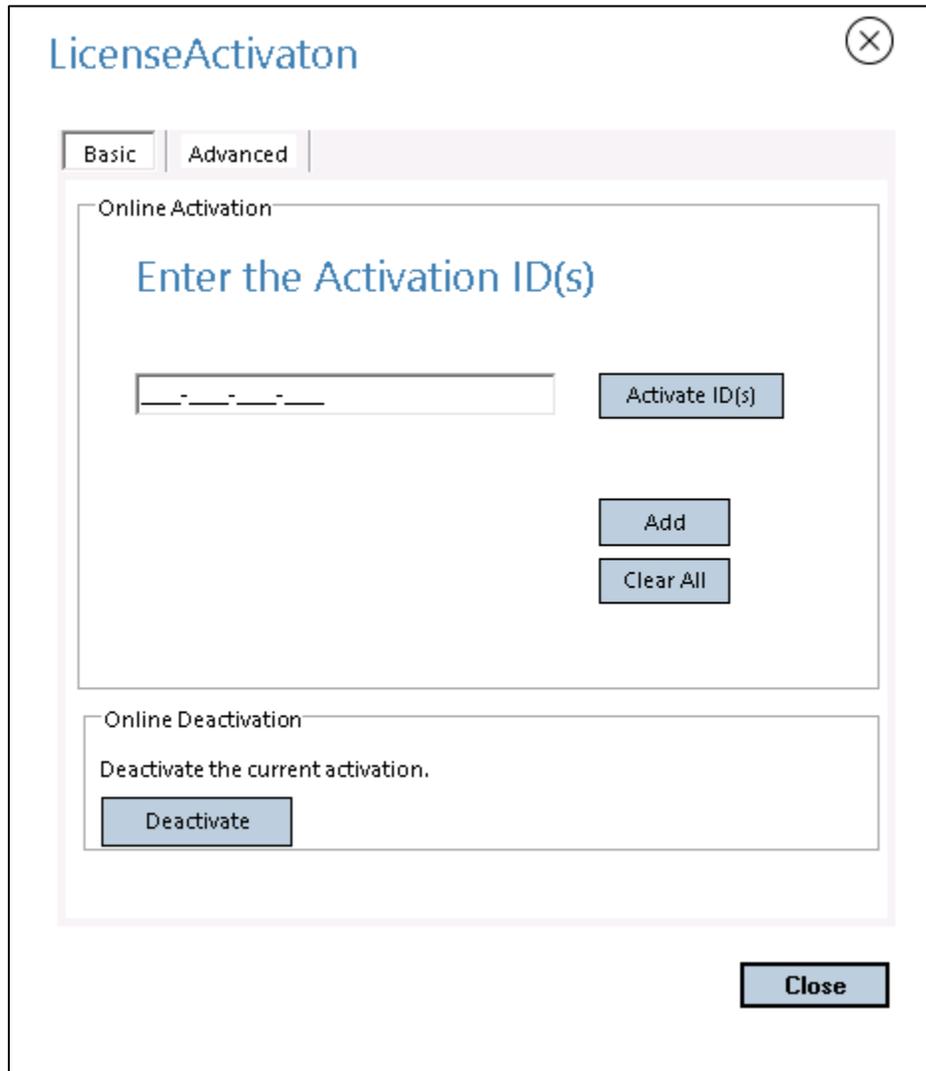

PC > Local Disk (C:) > Program Files (x86) > Biznet Software > BizNet Sample Data 1.2.0.0 >

Name	Date modified	Type	Size
BizInsight Installation Files	12/5/2016 3:18 PM	File folder	
BizNetServer Installation Files	12/5/2016 3:18 PM	File folder	
Content	12/5/2016 3:18 PM	File folder	
AccessToSQL.dll	11/15/2016 10:50 ...	Application extens...	
AccessToSQL.dll.config	11/15/2016 10:50 ...	CONFIG File	
AppConfigTool.exe	11/15/2016 10:50 ...	Application	
AppConfigTool.exe.config	11/15/2016 10:50 ...	CONFIG File

BIZNET Admin Tool.exe.config	11/15/2016 10:50 ...	CONFIG File	
BIZNET Content Installer.exe	11/15/2016 10:50 ...	Application	
BIZNET Content Installer.exe.config	11/15/2016 10:50 ...	CONFIG File	
BizNet.API.Helper.dll	11/15/2016 10:50 ...	Application extens...	

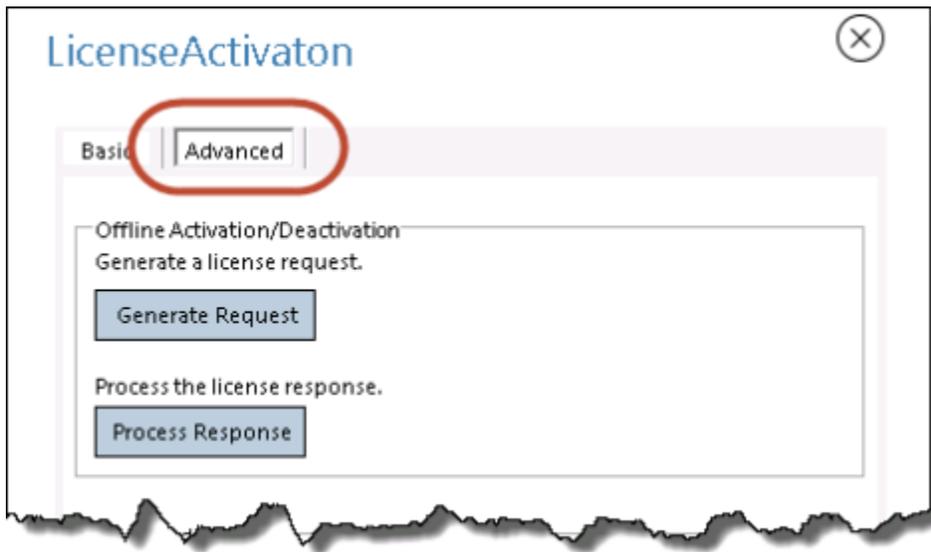

If this directory and file do not exist, start Excel and click on the Activate License button on the BizNet Product ribbon.

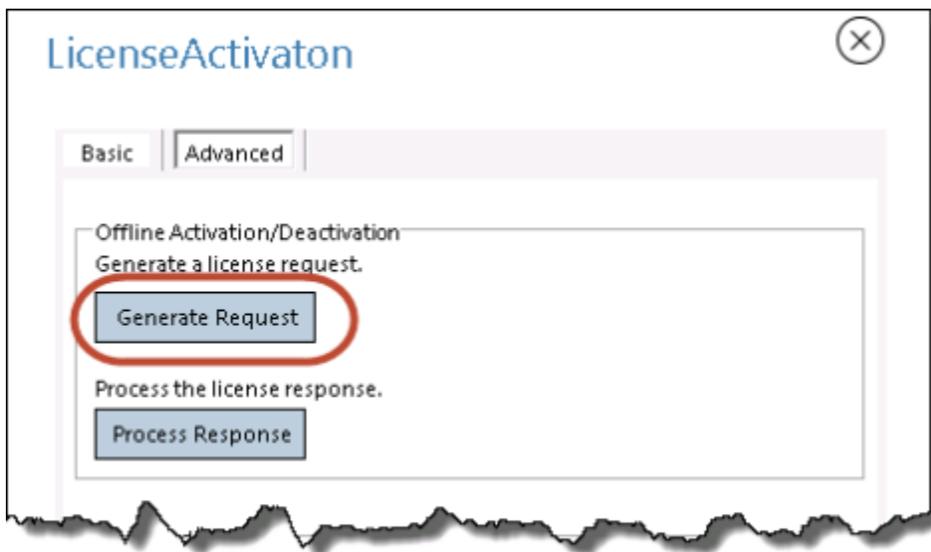

The **LicenseActivation** dialog will open.

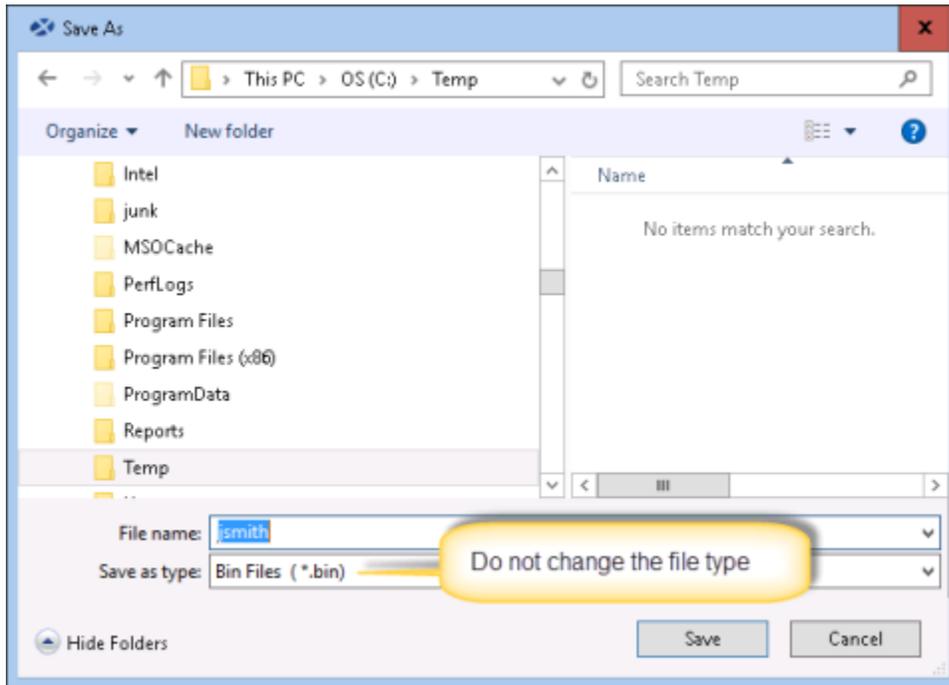

1. Click on the **Advanced** Tab.

2. Click on the **Generate Request** button.

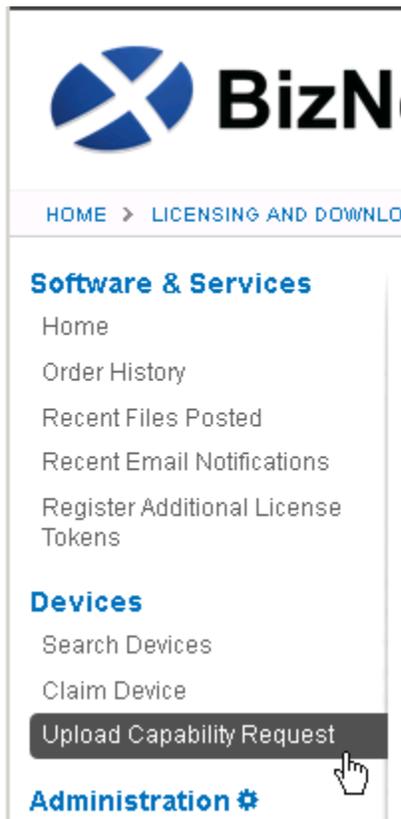

3. Browse to a directory on the workstation and type a file-name. Then click **Save**.

4. Copy the resulting .bin file to an external drive or network directory and go to a workstation that has internet access.
5. Log into the Customer Portal <https://biznet.flexnetoperations.com>.

6. On the left side, click on **Upload Capability Request**.

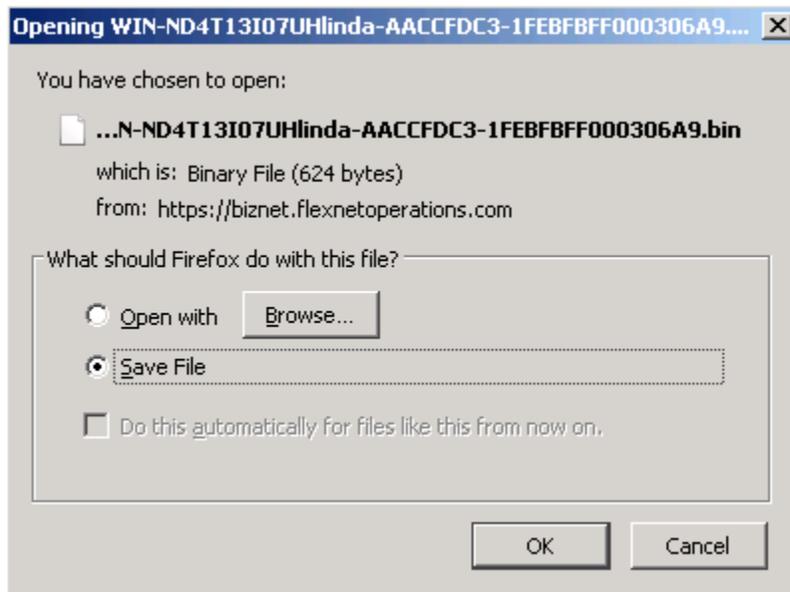

7. Browse to the .bin file generated on the client workstation. Click **Send**.

Upload Capability Request

Locate and send the offline request file. The browser will prompt you to save the response file.

jsmith.bin

8. Click **Cancel** when prompted to save the resulting .bin file. This response file does not contain the BizNet Product entitlement information.

9. Click on **Search Devices** on the left and click on the hyperlink of the Device just imported.

These are the devices assigned to your account. You may fill out additional criteria to

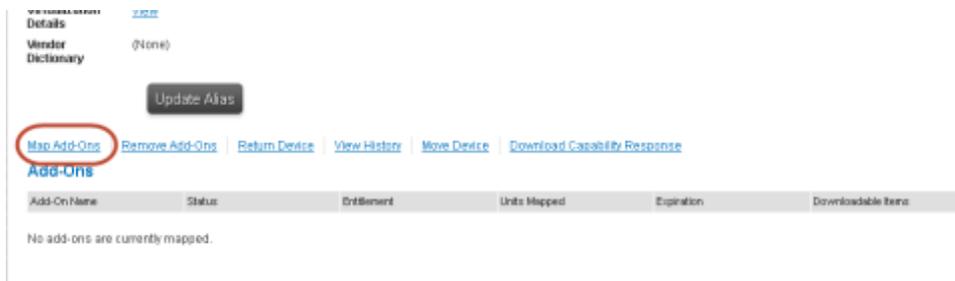

Device ID Activati

Alias

⏪ ⏩ 1 to 2 of 2 Entries per page: 25

Device ID	Alias
LDA\ISPC\davis-B2EBF7F4-BFEBFBFF000306A9	
WIN-ND4T13I07UHlinda-AACCFDC3-1FEBFBFF000306A9	

10. Click **Map Add-Ons**.

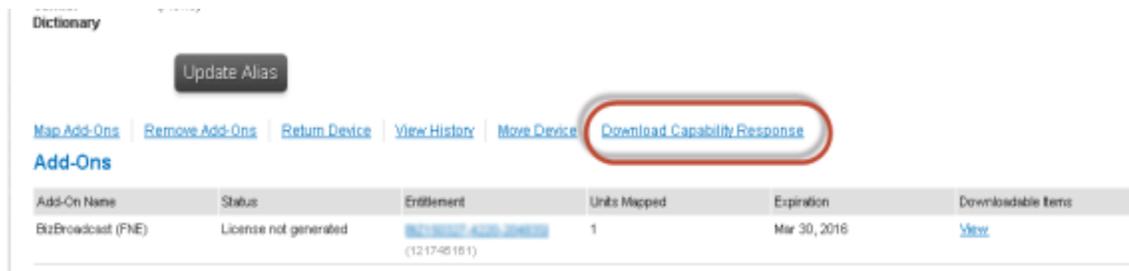

11. The **Map Add-Ons** dialog will open.

This dialog displays all entitlements of products that use this licensing method. Check that the **Available Units in Line Item** is not zero and enter "1" for the **Qty to Add** field. Click the **Map Add-Ons** button.

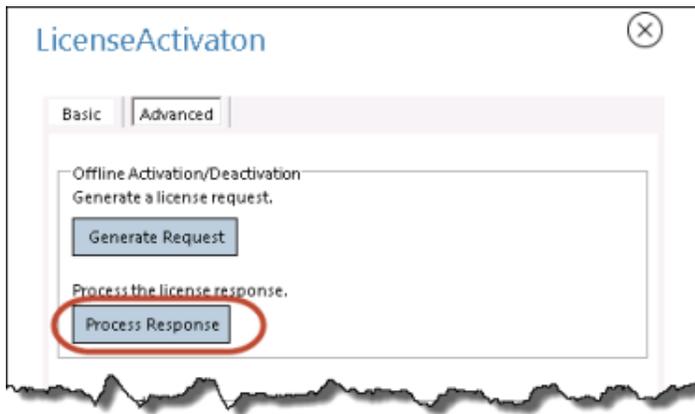

12. Click on the **Download Capability Response** link.

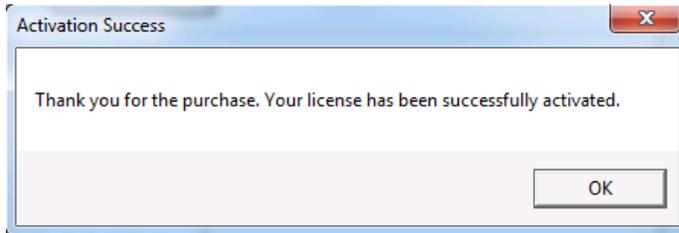

13. Copy the response file (.bin) to the external drive or network location then go back to the client workstation.

14. Go to the **Advanced** tab of the License Activation form and click on the **Process Response** button and select the response .bin file downloaded from the customer portal site.

15. You will get a message that the product was successfully activated.

If Activation continues to fail, contact BizNet Software Support, www.biznetsoftware.com/support/.

Moving BizNet Product Licenses

BizNet Product licenses may sometimes need to be moved; for example, the user got a new workstation or the reporting responsibilities were assigned to a different user. To move a license, do the following:

1. On the old workstation, double-click the content installer icon on the desktop:

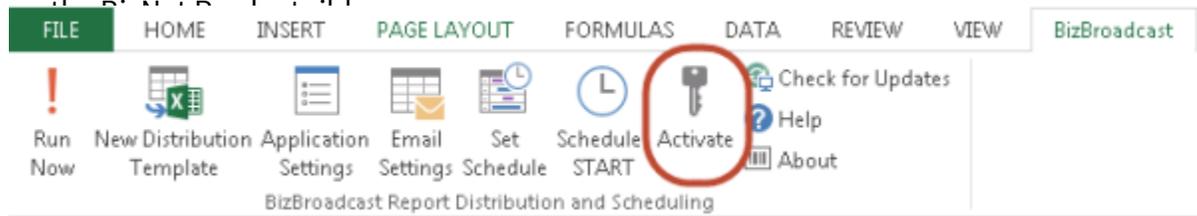

If there isn't a content installer icon on the desktop, browse to `c:\Program Files (x86)\Biznet Software\Content Name` and double-click the BIZNET Content Installer.exe.

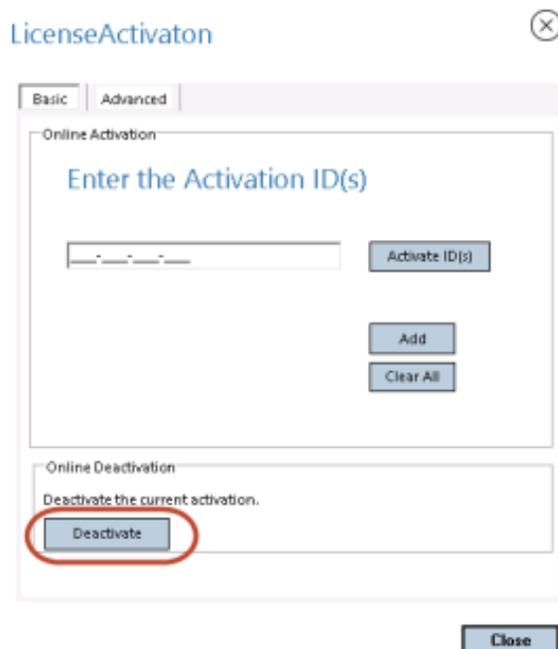

PC > Local Disk (C:) > Program Files (x86) > Biznet Software > BizNet Sample Data 1.2.0.0 >

Name	Date modified	Type	Size
BizInsight Installation Files	12/5/2016 3:18 PM	File folder	
BizNetServer Installation Files	12/5/2016 3:18 PM	File folder	
Content	12/5/2016 3:18 PM	File folder	
AccessToSQL.dll	11/15/2016 10:50 ...	Application extens...	
AccessToSQL.dll.config	11/15/2016 10:50 ...	CONFIG File	
AppConfigTool.exe	11/15/2016 10:50 ...	Application	
AppConfigTool.exe.config	11/15/2016 10:50 ...	CONFIG File	
BizInsight.sdf	11/15/2016 10:50 ...	SQL Server Comp...	
BIZNET Admin Tool.exe	11/15/2016 10:50 ...	Application	
BIZNET Admin Tool.exe.config	11/15/2016 10:50 ...	CONFIG File	
BIZNET Content Installer.exe	11/15/2016 10:50 ...	Application	
BIZNET Content Installer.exe.config	11/15/2016 10:50 ...	CONFIG File	
BizNet.API.Helper.dll	11/15/2016 10:50 ...	Application extens...	

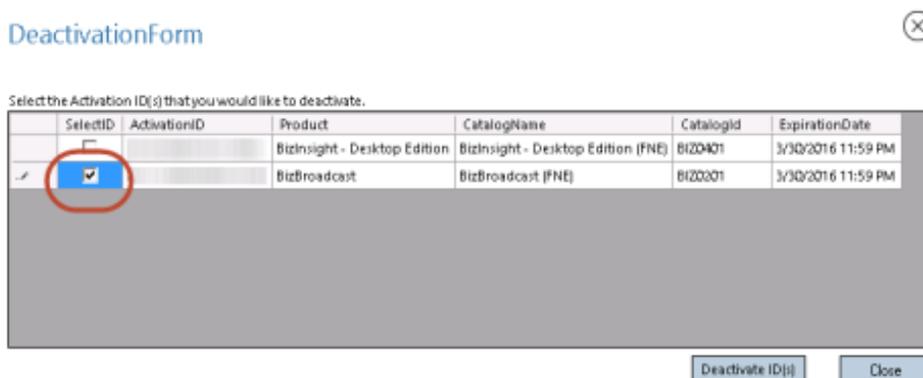

If this directory and file do not exist, start Excel and click on the Activate License button

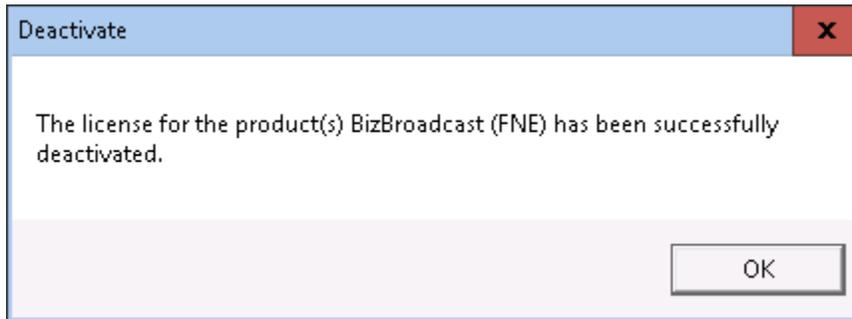

2. Click on the **Deactivate** button.

3. All activated licenses will display in the next dialog. Check the checkbox next to the license to be deactivated and then click **Deactivate ID(s)**.

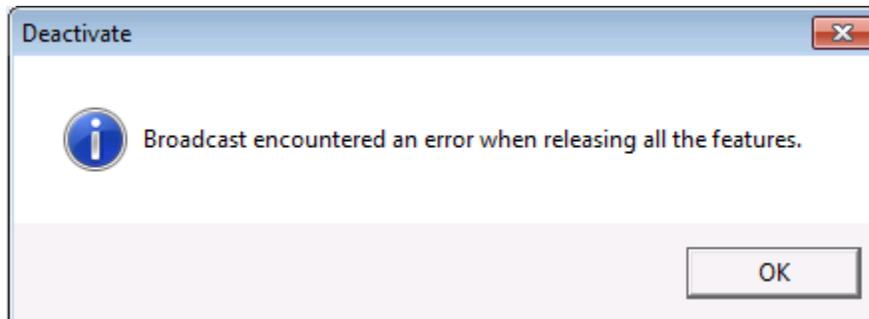

A dialog will open displaying the results:

4. If you deactivated from within Excel, **close and reopen Excel** to complete the deactivation.

If the workstation does not have internet access, the following error will occur and the license will have to be deactivated via the customer portal (<http://biznet.flexnetoperations.com>).

Once the license is deactivated, the same activation ID can be activated on the new workstation.

Manually Deactivating a BizNet Product License

If a BizNet Product license cannot be deactivated using the above process, do the following:

1. Click on the **About** button on the BizNet Product ribbon and make a note of the Device ID shown.

2. Log into the customer portal (<https://biznet.flexnetoperations.com>) and click on **Search Devices** on the left side.

- Click on the **Remove Add-Ons** hyperlink.

BizNet software

HOME > LICENSING AND DOWNLOAD CENTER > VIEW DEVICE

View Device

BizBroadcast (FNE)	BC71-3946-D059-CFDA	View Entitlement (121745161)	Mar 30, 2016	1	<input type="text" value="1"/>

[Remove Add-Ons](#)

6. The View Device dialog will show "Copies decreasing" for the status.

The screenshot shows a web interface for device management. On the left is a navigation menu with sections: **Devices** (Search Devices, Claim Device, Upload Capability Request), **Administration** (Account Administrators, Allocation Accounts, Account Members, Change Password, Email Preferences, Product Preferences, Download Preferences, Your Profile), and **Get Help** (Download Help). The main area displays device details:

- Status:** ACTIVE
- Series:** FLX_CLIENT_SERIES
- Model:** FLX_CLIENT
- Virtualization:** VMware
- Virtualization Details:** [View](#)
- Vendor Dictionary:** (None)

Below the details is an **Update Alias** button and a row of action links: [Map Add-Ons](#), [Remove Add-Ons](#), [Return Device](#), [View History](#), [Move Device](#), and [Di](#).

An **Add-Ons** table is shown below:

Add-On Name	Status	Entitlement	Units
BizBroadcast (FNE)	Copies decreasing	BIZ150327-4220-20483S (12.1745161)	0

7. Open Excel on the client workstation. If there is a **Restart Service** button on the ribbon, click **Restart Service** to complete the deactivation.

The screenshot shows the Microsoft Excel ribbon with the **Bizinsight 7** ribbon selected. The ribbon includes the following tabs: FILE, HOME, INSERT, PAGE LAYOUT, FORMULAS, DATA, REVIEW, VIEW, Bizinsight 7, and Bizinsight. The **Bizinsight 7** ribbon contains the following buttons: Load Bizinsight7, BizNet Assistant, Select Data, Query Data, Refresh Workbooks, Calculate Formulas, Design Mode, View Data, Check for Errors, PackNGo, and Activate. The **Bizinsight** ribbon contains the **Restart Service** button (circled in red), Updates, About, and Configuration.

If there isn't a Restart Service button, just close Excel.

8. Uninstall the BizNet Product from that client workstation.
